

Silver Saguaro Studios
Simple – Elegant – Jewelry

Working mostly in sterling silver, my style has become simple and elegant. With added touches of copper, brass or gold, I strive to make pieces that you can wear anywhere and treasure forever.

I started making jewelry in memory of my mother. She was an award winning quilt maker but she always wanted to try jewelry. Feeling that I could never equal her ability making quilts, I decided to try making jewelry. I began with books and videos and basically taught myself how to make simple jewelry. Now I have my own studio, Silver Saguaro Studios, and I love making sterling silver jewelry. And the best part is that I always have my mother with me when I am making my jewelry. To this day, I still sit in her chair, use her cutting board, and think of her while I am working. I am blessed to do what I love while feeling surrounded by someone I love and miss everyday.
