

We are Phil & Mattie Gadd and we fell in love with rocks several years ago after we retired from our careers. We found an interesting rock while on a hike, he cut it open and polished it, we were addicted to beautiful rocks ever since! It still amazes us that a plain rock on the outside can be so beautiful on the inside! Phil cuts, shapes and polishes each cabochon by hand, to bring out the beauty of each stone.

Mattie then takes these cabochons and wire wraps them into pendants, bracelets and rings using either sterling silver, gold fill or antique copper wire. Come and "discover the beauty of a rock" with Gaddabout Rock Creations!
